APPENDIX A

Cold Weather Best Practice

In the interest of health and safety for student-athletes, coaches, athletics staff, and spectators, the NAC has instituted cold weather best practices to prevent cold weather-related injuries and illnesses to all participants. These recommendations are in accordance with the National Athletic Trainers’ Association and the guidelines set forth by the NCAA. The athletic training staffs of the NAC institutions have conferred and agreed upon these standards.

These best practices are to be enforced in instances of conference competitions only. This best practice is not intended to override any school’s practice policy.

The following best practices pertain to “Active” sports (Men’s and Women’s Lacrosse, Men’s and Women’s Soccer, and Field Hockey) and “Limited Activity” sports (Baseball, Softball, Men’s and Women’s Track & Field, Men’s and Women’s Tennis, Men’s and Women’s Cross Country, and Men’s Golf).

The concern for student athletes that participate in Limited Activity sports is the student-athlete will be exposed to wind and cold temperatures during long periods of inactivity. During these times, student athletes may have difficulty maintaining proper body temperature due to exposure and lack of metabolic activity, thus, additional considerations are to be made to protect those student-athletes.

All temperatures indicated below are to represent the Wind Chill Temperature. The effects of the wind are to be taken into account. Ideally, the on-field conditions are to be used to determine the participation status. Furthermore, whenever possible, indoor warming facilities are to be made available to participants and spectators. When indoor warming facilities are not available, postponement is required at the previous step.

Cold Weather Best Practice for “Limited Activity” Sports

>40 degrees F – No restrictions on activities are required. Advisement is to be given to coaches to the temperature. Maintain regular hydration breaks.

32-40 degrees F – Recommend skin coverage for all athletes including gloves, hats, long sleeves, and leggings/pants. Monitor for cold weather injuries and have indoor facilities available for rewarming if needed.

25-32 degrees F – Required skin coverage as described above. Indoor rewarming should be available. For timed events, allow indoor rewarming for no less than 15 minutes following on field warmups and during halftime. For non-timed events, allow indoor rewarming for no less than 15 minutes during the first stoppage of play after 45 minutes of activity. *If no indoor rewarming facilities are available, activities are to be postponed at <32 degrees F

<25 degrees F – Postponement of athletic contests are required.
