

AWARDS INSTRUCTIONS (NOMINATORS)

This document will provide information on how to access and use the system. For questions or problems, please contact your conference administrator.

LOGIN

To log into the system, open an internet browser and navigate to <https://naiaawards.prestosports.com/awards>. The user's login is their institutional email address, and the password generated for you. In order to retrieve the system password, click on 'Forgot my password' below the login area. After the user enters their email address, the password will be emailed to the user once they click on submit. The user will be able to change their password after the initial login.

NOMINATING

Once the nomination timeframe has opened, a user will be able to login and nominate student-athletes for various conference awards. You will be able to see all of the awards accepting nominations at the current time when logged in.

Welcome to the awards nomination system. This page will list all the awards that are currently accepting nominations or votes, and show any you have already made.

Nominating

Award	Nominations accepted until	
Men's Soccer POTW	Sat, Jul 17 8:00 AM EDT	[nominate]
Cross Country POTW	Sat, Jul 17 8:00 AM EDT	[nominate]

Voting

No awards are currently accepting votes.

Click Nominate to begin the nominating process.

ENHANCED STATISTICS NOMINATIONS

If the award is setup to use enhanced statistics (all rosters and game files must be uploaded into the system prior to nominations), then you will first choose your team from the dropdown menu and then click the Pick Player button underneath. From here, you will see all of your players and their stats listed below. Choose the radio button next to the player you would like to nominate and click Add Information at the bottom.

You will then see all of your player stats for that given time period as well as additional nominating fields to fill out to finish the nominating process. Click Nominate at the bottom once finished. You will then see the nomination screen showing your nomination below.

CUSTOMIZED NOMINATIONS

If the award is setup as a custom award (used for non-networked sports like Golf, Swimming, etc.), then you will click [nominate] and see the fields for individual information. This should be filled out completely with attention paid to correct spelling. Click Nominate at the bottom once finished. You will then see the nomination screen showing your nomination below.

Form fields: Institution, Submitter, Nominee, Year, Position, Hometown, Game Stats/Supportive Material. Buttons: Nominate, Cancel.

VOTING

Once the nominating process has closed, the voting timeframe will open. If you are setup as a voter for an award, open an internet browser and navigate to <https://naiaawards.prestosports.com/awards> and login using the same email address and password as used for nominations.

If the voting timeframe is open [vote] will appear next to the nomination name. After the user has selected a ballot to vote on, the voting screen will be displayed.

Vote on an award (add or edit)

Submissions

Please rank these nominations. When you give the correct number of votes allowed by this award, you can click "Vote" on the right to save them.

YOUR VOTES

Located in the top right-hand corner of the screen is the voting status area. Shaded areas (highlighted in Yellow) require the user's attention, and a problem description will be displayed. In this instance, the system is informing the user that no votes have been entered.

TO VOTE

Click on the ranking dropdown to display the voting choices. The voting values will vary depending on how the award was setup by the administrator. You are able to see your own nominees although your admin may have set it up so you can't vote for your own nominees.

While the user will be able to see their own nominees for All-Conference, they are not allowed to vote for individuals they have nominated for All-Conference as per conference rules.

VOTING ERRORS

If a user incorrectly votes for one of their own nominees or assigns two nominees the same vote value, the system will alert the user to possible errors in their votes in the voter status area.

Once corrections have been made, votes can be submitted. Click on the Vote button to submit votes. The user will be brought back to the voting main menu in order to continue submitting votes on other open ballots. Once all voting has been completed, you can log out of the system. A user can log into the system to review or change their votes until the timeframe for voting has closed.
