Gray Riley was MIT’s lone representative at the College Squash Association (CSA) Individual National Championships. Riley opened the tournament with an 11-5, 11-4, 11-3 loss to Eric Caine of Yale University. The next day, he fell to Antonio De La Torre of Franklin & Marshall with scores of 11-5, 11-5, 11-2. Riley was only the eighth player in MIT squash history to make it to the individual championships, the last of which being West Hubbard in 2011.

At the CSA Team Nationals, MIT wrapped up the weekend with a record of 1-2 after winning against the University of Washington with a score of 8-1 and falling to Denison University and Washington University of St. Louis, both by 5-4 decisions. Sung Won Cho and Connor Kirschbaum were the only undefeated Engineers at the end of the Championships, winning all three matches against their opponents. Tatsiana Ivonchyk left with two wins and a loss.

MIT performed well at the Boston Round Robin, wrapping up the home event with a record of 2-2, after defeating UC Berkeley and Bard College, both with 9-0 decisions, and falling to Bates College and Navy, also with scores of 9-0.

Throughout the season, Tech blanked the University of Vermont, UC Berkeley and Bard, winning each game to give them an easy 9-0 win.

The Engineers closed the season at No. 38 in the CSA team national rankings, dipping only slightly from last year’s No. 34 ranking. Riley was ranked 81st in the CSA individual rankings.

Nadeem Mazen enters his fifth season as head coach of the MIT squash team. Mazen’s appointment marks his first intercollegiate coaching post.

During the 2012-13 season, he led the Engineers to wins against the University of Vermont, UC Berkeley, Bard College, Boston University and the University of Washington. He also coached Gray Riley to the sophomore's first CSA Individual National Championship appearance.

A four-year player at MIT, Mazen served as the captain during his junior and senior campaigns and captured the No. 1 spot on the team ladder his senior season. As an undergraduate, he was a mentor and coach for Kosvar refugees. In addition, Mazen coached middle school students in MIT's Science Technology Engineering and Math Summer Program. From 2007-09, Mazen was a one-on-one instructor for beginner and intermediate players in the greater Boston area.

A 2006 graduate, Mazen earned a bachelor's degree in Mechanical Engineering.

Stephen Howland  2011

About MIT
Location  Cambridge, Massachusetts
Founded  April, 1861
Enrollment  4,112 (undergraduate)
Colors  Cardinal and Gray
Nickname  Engineers
Mascot  Beaver
President  Rafael Reif
Athletic Director  Julie Soriero

The MIT Campus

MIT is located on 168 acres that extend more than a mile along the Cambridge side of the Charles River Basin across from downtown Boston. The central group of interconnecting buildings was designed to permit easy communication among schools and departments. To meet the changing needs of teaching and research, the Institute recently added a remarkable array of new facilities designed by distinguished architects. Included was an undergraduate residence; the Zesiger Sports and Fitness Center; a Stata center for Computer, Information, and Intelligence Sciences and a Brain and Cognitive Sciences complex. Also in construction is a graduate residence complex, a new cancer research facility, and a major field project for MIT’s outdoor sports venues. Today MIT is a world-class educational institution. Teaching and research—with relevance to the practical world as a guiding principle—continue to be its primary purpose. MIT is independent, coeducational, and privately endowed. Its five schools and one college encompass numerous academic departments, divisions, and degree-granting programs, as well as interdisciplinary centers, laboratories, and programs whose work cuts across traditional departmental boundaries.

Institutional Facts

• According to Washington Monthly’s annual ranking of universities, which rates schools based on service to the world, MIT currently ranks as the No. 1 university in the country
• MIT’s School of Engineering, Department of Economics and more than a dozen graduate and doctoral programs ranked No. 1 nationwide in U.S. News & World Report’s annual evaluation of American universities while MIT’s Sloan School of Management was currently ranked second nationwide among undergraduate business programs
• Seventy-six current and former members of the MIT community have won the Nobel Prize
• More than one-third of the nation’s space flights have included MIT-educated astronauts

Athletic Excellence

• MIT was rated No. 4 in the 2010 National Collegiate Scouting Association (NCSA) College Power Rankings, which ranks the best schools in America based on athletic performance; U.S. News and World Report institution rankings; and graduation rate
• MIT is the all-time Division III leader in producing CoSIDA Academic All-Americas (188) while the Engineers rank third across all NCAA divisions
• MIT athletes have authored 34 individual national championships and have won 22 team championships
• In the past 10 years, the Engineers have received 464 All-America honors and sponsored individual national champions in pistol, gymnastics, track and field, swimming and diving, men’s tennis, skiing and women’s fencing
• MIT student-athletes have earned at least 20 All-America honors every season since 2001 and set a school record with 88 All-America accolades in 2011-12
• 23 graduates have participated in the Olympic Games, winning two Gold and two Silver medals
